ultimate success of any repair, because stabilization and medical management are needed before referral for more definitive treatment.

Field Fracture Management - ScienceDirect

Although these fractures may be minimally displaced and appear to lend themselves to external coaptation, in small breed dogs the blood supply in the distal radius is decreased compared with large breed dogs, putting small breed dogs at a higher risk for healing complications. 2 In small and toy breed dogs, 83% of distal radius/ulna fractures addressed with external coaptation alone result in ...
