stuff too if you're willing to look around.

## **Iptables Guide**

```
iptables-A INPUT -p tcp -m multiport  
--dports 22,5901 -s 59.45.175.0/24 -j  
DROP. Let us consider another example.  
Say, you want to block ICMP address  
mask requests (type 17). First, you  
should match ICMP traffic, and then you  
should match the traffic type by using  
icmp-type in the icmp module: iptables-  
A INPUT -p icmp -m icmp --icmp-type 17  
-j DROP
```
