Ayer has always given the problem of perception a central place in his thinking. Reasonably so; for a philosopher's views on this question are a key both to his theory of knowledge in general and to his metaphysics. The movement of Ayer's own thought has been from phenomenalism to what he describes in his latest treatment of the topic as 'a sophisticated form of realism'.¹The epithet ...

Perception and its Objects | Semantic Scholar

CiteSeerX - Document Details (Isaac Councill, Lee Giles, Pradeep Teregowda): Here is an influential inconsistent triad of claims concerning the nature of perceptual experience and its objects. (1) Physical objects are mind-independent. (2) Physical objects are the direct objects of perception. (3) The direct objects of perception are mind-dependent.

Perception of objects - Cognition | Coursera

Perception thus means the correct presentation through the senses of an object in its own uniqueness as containing only those features which are its and its alone (svalakṣaṇam). The validity of knowledge consists in the sameness that it has with the objects presented by it (arthe a saha yatśārūpyam sādṛśyamasya jñānasya tatpramāṇamiha).

Sautrāntika Theory of Perception [Part 14]

Read Book Perception And Its Objects Reprint Edition By Brewer Bill 2013 Paperback

The recognition stage is an essential part of perception since it allows you to make sense of the world around you. By placing objects in meaningful categories, you are able to understand and react appropriately. Take action. The final step of the perceptual process involves some sort of action in response to the environmental stimulus.

What Is Perception?

I think what he means by that is that because an object's existence is defined by its properties, and these properties are things that can be only consciously experienced, the perception and examination of objects is consciousness experiencing and examining itself.

sensory information to understand ourselves and others.

Perception: Definition, Importance, Factors, Perceptual ...

Ayer has always given the problem of perception a central place in his thinking. The movement of Ayer's own thought has been from phenomenalism to what he describes in his latest treatment of the topic as 'a sophisticated form of realism'. The epithet is doubly apt. No adequate account of the matter can be simple; and Ayer's account, while distinguished by his accustomed lucidity and ...

Perception and its Objects - Oxford Scholarship

Flexibility is a fundamental hallmark of perceptual systems. In particular, there is a great deal of flexibility in the ability to perceive properties of occluded objects by effortful or dynamic touch-hefting, wielding, or otherwise manipulating those objects by muscular effort. Perception of length ...

Turning perception on its head: cephalic perception of ...

Everson discusses the five senses and their proper objects; e.g. sound for hearing, colour for sight. The senses, Everson argues, are essentially related to their proper objects because they are essentially such as to be affected by them. There is thus an intrinsic (kath'hauto) relationship between a
