can cover clothing and skin with a fine black powder, so we recommend protective gear and dust masks. BOS 100 ® SDS. BOS 200 ® SDS. Trap & Treat ® Microbe SDS

INSTALLATION - Remediation Products, Inc.

Two primary treatment mechanisms take place with BOS 200®: The first mechanism is the “Trap”: BOS 200® uses activated carbon to adsorb petroleum hydrocarbons.

Biodegradation, the “Treatment”, is the second mechanism of BOS 200® remediation.

RPI Group

Setting the unsecured DOC 200 trap is not going to be easy until you learn the knack, so make certain that you have that safety in place - or much safer still, just don't use double-DOC traps! If vermin narrowly escape being caught, they'll seldom fall for the same trap design again.

Predator Control - DOC traps - Fish & Game

treat PHCs (and cVOCs) along property boundaries. The technology is referred to as a “Trap and Treat” concept. Previously the use of GAC in the subsurface has been limited due to the limited adsorptive capacity of the GAC. However, a new technology (to Canada) allows for both the adsorption and the treatment of the dissolved PHCs.
